**THE FLORIDA DEPARTMENT OF HEALTH IN MIAMI-DADE COUNTY
PARTIALLY LIFTS PRECAUTIONARY SWIMMING ADVISORY**

Miami- Based on a satisfactory microbial water quality test result, the Florida Department of Health in Miami-Dade County is partially lifting the precautionary swimming advisory that was issued on September 11, 2017 for all public beaches in Miami-Dade County.

The precautionary swimming advisory is still in effect for:

**Oleta State Park
Key Biscayne Beach Club
Cape Florida State Park**

Today September 15, 2017, DOH-Miami-Dade was able to gain access to the three sites listed above and anticipates all results to be completed by tomorrow, Saturday 16, 2017.

Until results are available from testing sites conducted after the storm, you should assume that water contact may pose an increased risk of disease, particularly for immunocompromised individuals.

About the Florida Department of Health

The department, nationally accredited by the [Public Health Accreditation Board](#), works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

Follow us on Twitter at [@HealthyFla](#) and on [Facebook](#). For more information about the Florida Department of Health please visit www.FloridaHealth.gov.
